

REMOTE CAMERA

Description

The camera used by Gestecno is IP bullet, 3 MP video resolution, with UMTS 3G integrated modem and integrated standard antenna. The camera is equipped with infrared LEDs that allow night vision up to 30 meters without light sources.

The camera is very solid and resistant, suitable for open air applications (IP67 protection class).

The remote control is in P2P mode through software or with smartphone or tablet application (Android and iOS operating systems).
