

DIGITAL DEPTH CALIPER

Description

The relative movements between deep anchors and the head of the extensometer can be detected using some electrical transducers of movement (in case of monitoring with remote capture), or more simply with a depth gauge (in the mechanical or digital version).

Technical Features

Measurement	digital
Range	0-150 mm, 0-200 mm
Accuracy	+/- 0.02 mm
Resolution	0.01 mm
Ripeteability	+/- 0.01 mm
Operating temperature	-10...+40 °C
power	battery 1.5 V SR44
case	plastic
Class of Protection	IP55

Please specify

CODE	PRODUCT DESCRIPTION
CAL-515	Digital depth caliper, FS 150 mm
CAL-520	Digital depth caliper, FS 200 mm
